Painting Contractor

If we paint your home or business you will have confidence in a job well done by a licensed contractor which has a long list of satisfied customers. We have recently changed our name to reflect our new line of energy saving products in today's new market for coatings that are both energy efficient and cost effective. No job is too big or too small.

Residential and Industrial Coating Applicator

Arizona Superior Coatings specializes in certified application of industrial and residential coatings. Our products are industry tested and industry proven. Our customers are not limited to just residential, we offer commercial and industrial applications as well. Please take a moment to see what our products have to offer by browsing our website. Feel free to contact us for more information or to set up an appointment for an evaluation or estimate.

Company, guarantee conditions and service:

Coatings are as good as the company that produces or applies it. It is not important to only sell a quality coating but it needs to provide the customer with complex solutions for their needs. Manufacturer SPI II, Inc. has operated on coating market since 1991. During its 18 years existence SPI II, Inc. has been improving its products with countless tests and has gained huge

experiences in a development and application of insulating coatings. The manufacturer fully guaranties for quality of its products and grants an ultimate 10-year guarantee.

Because of keeping qualitative procedures at warehousing, distribution and application, products are not freely selling on the market, but are wholly distributed by authorized distributors and certified contractors for each territory. These contractors can professionally apply products and offer guarantee service. Our company, Arizona Superior Coatings is a member of the SPI family, that distributes products in the State of Arizona and provides application of these products by strictly following the qualitative procedures set forth by Superior Products International.

Durability and longevity:

From our experience we know that ordinary coatings deal with problems for only a SHORT time. SPI coatings are very durable, and will last a long time against weathering and abuse. We carry some of the longest-lasting liquid applied systems available. Super Therm® has an expected lifespan in excess of 20 years, while Rust Grip® should easily last 15 against weathering. Rust Grip® will also withstand 6700-PSI abrasion, and will not flake or peel due to its excellent adhesion.

We are Licensed - Bonded - Insured

Genuine SPI COATING PRODUCTS can only be purchased from SPI Authorized Representatives displaying the SPI Authorized Logo.
